

POWER APPS FUNDAMENTALS

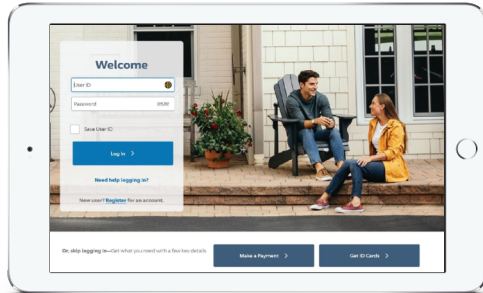

COURSE OVERVIEW

Power Apps is one of Microsoft's most powerful tools for streamlining work, and it's more accessible than you might think. With its low-code/no-code design, Power Apps lets users build custom applications that automate processes, integrate data, and solve everyday business challenges. But getting started can feel overwhelming.

That's where this course comes in. Power Apps Fundamentals is designed to help beginners unlock the platform's full potential. In just one day, you'll gain the skills and confidence to build apps that make your work easier, faster, and more effective...no coding required!

This is an exciting first step on your app development journey where ideas turn into real, working solutions. As you build your first apps and see what's possible, you'll gain the skills and confidence to keep going, including preparation for the PL-100: Microsoft Power Platform App Maker Associate certification.

KEY KNOWLEDGE TRANSFER

Build basic Canvas and Model-Driven apps using Power Apps.

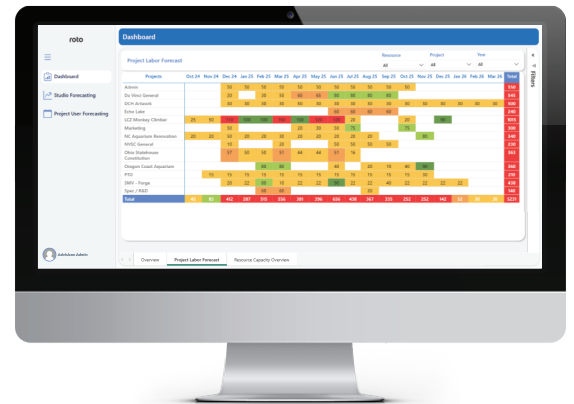

Connect apps to various data sources like SharePoint and Excel.

Customize app layouts and controls to create responsive designs.

Publish and share apps within your organization.

WHO SHOULD ATTEND

- Business Analysts
- IT Professionals
- Power Platform learners
- Anyone looking to build custom business applications

As a prerequisite, students should have a basic understanding of Microsoft 365 and familiarity with data sources such as Excel and SharePoint.

COURSE MATERIALS

Course materials include a comprehensive course manual with detailed instructions and hands-on practice. Attendees may also earn Professional Development Credits from PMI.

POWER APPS EXAMPLES

Not sure of the potential? These real-world examples show how Power Apps can make work easier.

Track Equipment in Real Time

Quickly build an app that lets team members check equipment status, log maintenance, and track inventory levels—perfect for operations, field teams, and more.

Streamline Onboarding

Create an HR app that guides new hires through onboarding steps, collects required docs, and connects them to key resources, all in one place on any device.

Boost Sales Team Productivity

Design a mobile-ready sales tool that pulls in product info, pricing & lead details from various systems. Your team can work on the go, respond, and close deals quicker.

COURSE OBJECTIVES

Understand the Basics

- Power Platform overview
- Canvas and Model-Driven App differences

Create Basic Canvas Apps

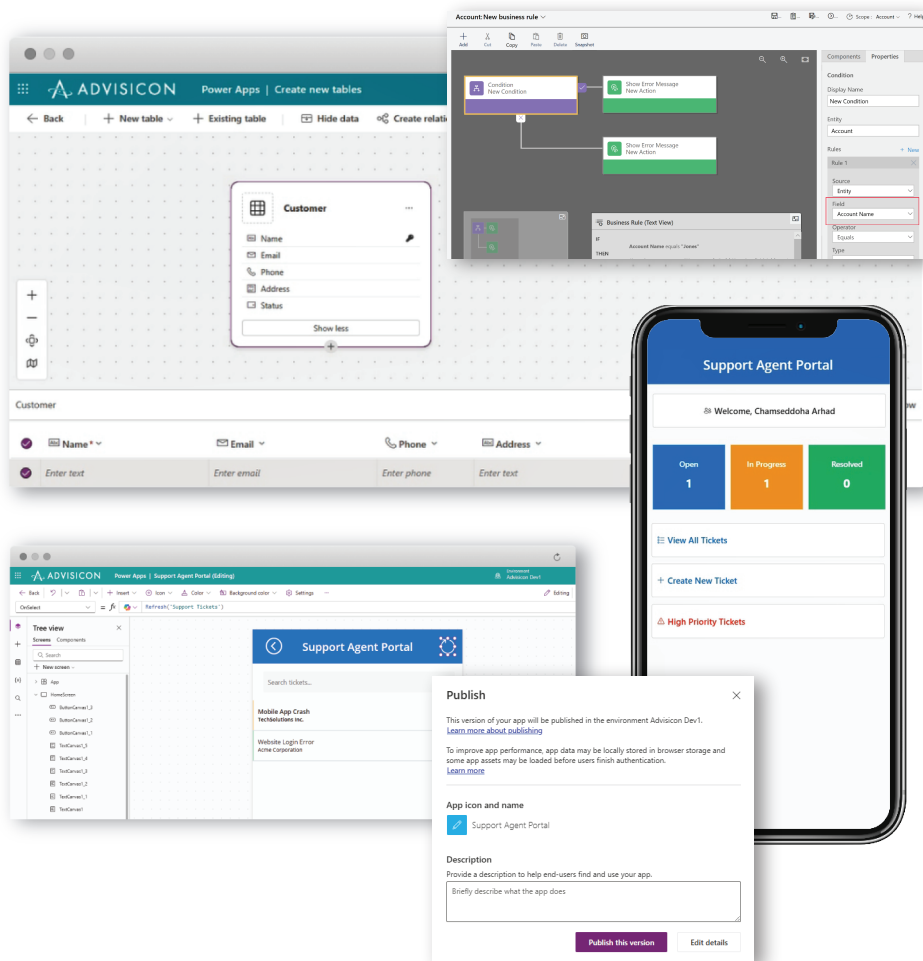

- Building from templates and from scratch
- Adding controls and designing user interfaces
- Connecting to data sources

Develop Model-Driven Apps

- Understanding the Dataverse
- Creating tables & relationships
- Building model-driven apps for structured data scenarios

Publish and Share Apps

- Testing apps & troubleshooting errors
- Publishing apps within the organization
- Permissions and security

COURSE INSTRUCTORS & ACCREDITATION

Our company is made up of Microsoft Certified Professionals. Further, as a Microsoft Solutions Partner company, we have our thumb on the next generation of technology. This course will be taught by a Power Apps specialist with comprehensive knowledge of the Microsoft Power Platform.

Advisicon's goal is to improve your processes and technologies, thus creating measurable results. For over 30 years, we have successfully helped clients accelerate, adapt, and achieve.

PAIN POINTS THIS COURSE TARGETS

I TRIED (AND FAILED) TO BUILD AN APP.

Even though Power Apps has a low-code/no-code approach, a lack of fundamental knowledge can make the software difficult to use. We'll give you the basics and empower you to create apps without coding expertise.

MY IDEAL APP NEEDS MANY DATA SOURCES

We get it; disparate data can overwhelm. This course shows you how to seamlessly connect and integrate your data, so your apps work smoothly and reliably.

OUR STANDARD APP ISN'T QUITE MEETING OUR NEEDS

A tailored app that meets specific business needs can save your organization hours in tedium. Learn how to have the customization control you need with your Power App.

DEPLOYING & SHARING APPS IS CONFUSING

Once your app is ready, getting it into the hands of the right users can be a challenge. We'll teach you how to publish, share, and manage permissions effectively. Your whole team can benefit!
