Education

- 2008 Red Seal in Steamfitter/Pipefitter N.B.C.C., St. John
- 2015 Alberta Construction Safety Association (CSTS)
- 2002 Red Seal in Industrial Mechanics/Millwright N.B.C.C., St. John
- 1989-1990 graduate of Digital Electronics N.B.C.C., St. John (Diploma)
- 1985 graduate of Fundy High School (Industrial Student) (Diploma)
- Leadership for safety excellence

Employment

SCN Lavalin / Kentz Field Operations

Aug 2018- Sept 2018 (Completed Project)

Pipefitter, Alberta CNRL scheduled shutdown

- Demolition of piping spools. Remove and or modify existing pipe spools. Prepare piping components and set up for the welding stage of piping spools. Hydrotesting and air blow as required, bolt-up of flanges, valves and instruments and vessels. Complete walkdowns for final inspection, identifying deficiencies as per ISO.

KBR Canada LTD.

July 2017- Nov 2017 (Completed Project)

Interdisciplinary Release Coordinator (IDR), Alberta Fort Hills Project (16.5 Billion)

- Coordinate the release of Piping, EHT, Instrumentation and Insulation as required. Attending construction management meeting to assist in setting priority system releases for highly sensitive timelines. Support all discipline management team in a technical manner for retrieving documentation and the use of Navisworks freedom 3D model. Updating master release spreadsheet while processing daily reports to project management.

Sascal Instrument Services

Sept 2016- May 2017 (Completed Project)

Mechanical tech - K+S Legacy Site, Regina Saskatchewan (4.5 Billion)

- Hired to represent Ames Foster Wheeler in the final inspections and sign off of all mechanical related equipment, create work to go punch lists for NOR walk downs, build commissioning work to go packages (1200+ packages), review of ITR commissioning check sheets prior to signing off, final for inspection/verification and completeness, create LOTO plans/certs to ensure safety of mechanical team for their scope of work, using excel spreadsheets to track all mechanical

activities, report status daily to site supervision, search for relevant vendor information related to mechanical equipment as required, update work to go punch items as they are created or completed. Working with Navisworks Freedom 3-D model information related to mechanical scope of works as required.

FSE Energy

June 2016 to Aug 2016 (Completed Project)

QA/QC Supervisor – Fort St James B.C., Bio-Mass Project

- Coordinated pre/post hydro QC walk downs and inspections, followed with verification / witnessing of the tests and reinstatement activities. Build hydro and pneumatic test packages, follow up with ENG for approval and release for testing. Review turn over binders for final sign off. Sign off mechanical check sheets as per ITP requirements.

Stuart Olson Diamond Ventures

Jan 2016 to May 2016 (Completed Project)

QA/QC Technician – Gahcho Kue Mine, NWT (\$700 million)

- Technical support with quality process and procedures, punch list coordinator multi discipline for final walk downs deficiencies, building hydro/pneumatic test packages and construction work packages, updating the hydro/pneumatic testing, status and punch logs, give status reports to senior construction manager on construction and quality control progress daily, punching lines for pre and post-hydro/pneumatic and service packages, support construction piping and quality testing activities when required with Navisworks Freedom 2015 daily.

Innovator Industrial Services

April 2015 to June 2015 (Completed Project)

QC/QA Lead Technician – Husky Sunrise Oil Sands Project (\$3.2 Billion)

- Single point of contact for inter-disciplinary transfer of items from piping through to electrical tracing, glycol tracing, inline or threaded instrumentation and insulation. Review to validate system turnover piping packages for completion, review, correct and sign system packages final AB83 to submit to the client for acceptance.

Saipem Construction Canada Inc.

June 2013 to March 2015 (Completed Project)

Construction Hydro Test Superintend/Lead – Husky Sunrise Oil Sands Project (\$3.2 Billion)

- Managed all aspects of construction hydro testing, reinstatement and assisted CS&U with the clean pipe program. 2000 plus hydro / pneumatic / visual test packages.

Flint Infrastructure Services Limited

Oct 2012 to June 2013 (Requested leave)

QC Lead Hydro Coordinator - Conoco Phillips Surmont 2 (\$2 Billion)

- Lead coordinator for the building of the hydro test packages. Coordinated QC inspections for pre/post hydro related activities, followed with verification / witnessing of the tests and reinstatement. 200 plus hydro / pneumatic / visual test packages.

Flint Infrastructure Services Limited

Jan 2012 to Sept 2012 (Completed Project)

QC Lead Hydro Coordinator - Suncor Firebag stage 4 DSU (\$3.6 Billion)

- Lead coordinator for the pre/post hydro QC walk downs and inspections, followed with verification / witnessing of the tests and reinstatement activities. 200 plus hydro / pneumatic / visual test packages.

Flint Infrastructure Services Limited

May 2011 to Dec 2011 (Completed Project)

QA/QC Turnover / Commissioning Coordinator - Suncor Firebag Stage 3 (\$3.6 Billion)

- Coordinated pre-commissioning activities related to punch items being created through their process and procedures, documented and verified closure of punch items through visual and with validated documents submitted as turnover.

Flint Infrastructure Services Limited*Feb 2011 to May 2011(Completed Project)**Construction Preservation Millwright Foreman - Suncor Firebag Stage 3 (\$3.6 Billion)*

- *Supervised preservation activities of all pumps, motors, blowers ect. Documented and logged daily progress of preservation requirements as per manufacture and owners request. Complete punch items as they were related to mechanical activities as required.*

Flint Infrastructure Services Limited*April 2008 to Nov 2010 (Completed Project)**QC Hydro Coordinator - Shell Project Albain Sands, (\$2 Billion)*

- *Coordinated pre/ post hydro QC walk downs and inspections, followed with verification / witnessing of the tests and reinstatement activities. 1200 plus hydro / pneumatic / visual test packages. Single point of contact for inter-disciplinary transfer of items from piping through to electrical tracing, glycol tracing, inline or threaded instrumentation and insulation. Review of hydro and pneumatic test packages prior to final customer acceptance for TCCC.*

Flint Infrastructure Services Limited*Oct 2005-Feb 2008 (Completed Project)**Pipefitter Lead hand - Long Lake Opti/Nexin (\$2 Billion)*

- *Worked as a pipefitter lead hand. I have been given many opportunities to challenge myself; it was a pleasure to work along professionals and to be considered a team player among them. Having a strong safety culture back ground through my previous employment as an industrial mechanic. This was a great experience for me, as it was the first time working in the oil sands.*
