Aviation Mechanic

Abaco Flight Services Ltd

September 2008 to 2013

Services, repairs, and overhauls aircraft and aircraft engines to ensure airworthiness.

- Repairs, replaces, and rebuilds aircraft structures, such as wings and fuselage, and functional components including rigging, surface controls, and plumbing and hydraulic units, using hand tools, power tools, machines, and equipment such as shears, sheet metal brakes, welding equipment, rivet gun, and drills.
- Reads and interprets manufacturers' and airline's maintenance manuals, service bulletins, and other specifications to determine feasibility and method of repairing or replacing malfunctioning or damaged components.
- Examines engines for cracked cylinders and oil leaks, and listens to operating engine to detect and diagnose malfunctions, such as sticking or burned valves.
- Inspects propeller blades to detect cracks or breaks.
- Tests engine operation, using testing equipment such as ignition analyzer, compression checker, distributor timer, and ammeter, to locate source of malfunction.
- Replaces or repairs worn or damaged components, such as carburetors, alternators, and magnetos, using hand tools, gauges, and testing equipment.
- Removes engine from aircraft, using hoist or forklift truck.
- Disassembles and inspects parts for wear, warping, or other defects.
- Repairs or replaces defective engine parts and reassembles and installs engine in aircraft.
- Adjusts, repairs, or replaces electrical wiring system and aircraft accessories.
- Performs miscellaneous duties to service aircraft, including flushing crankcase, cleaning screens, greasing moving parts, and checking brakes.
