Additional Information

Thank you for my consideration. My name is Justin Langford, I graduated NAIT's Heavy Equipment Technician 4 year program October 2017, and obtained my red seal ticket. I have spent most of my HET career with Western One performing diagnosis and trouble shooting, repairing, and overhauling electrical, hydraulic and mechanical aspects of Aerial lifts and material handlers. I have driven the service truck for most of my career travelling from site to site, diagnose and repairing, listening to customer concerns, and safely performing my tasks on site while following all safety guidelines.

I currently work for Fath group at O'Hanlon paving working on graders, excavators, pavers, rollers, grinders and mixers, and various paving related equipment.

I am 24, actively enjoy snowboarding, motorcycles and video games, as well as a passion for fitness and nutrition. Safety is #1 in my books as I want my self and everyone else to go home satisfied we performed our duties above expectations.
