

Ken Kastendieck

Journeyman Electrician

Tofield, AB

kastendieck@yahoo.com

780-662-3631

Since starting work as an industrial electrician I have been assigned several roles and leadership positions. Positions include, working in the construction field, being a mentor, working shutdowns, crew lead, maintenance, RFI coordination and research, redlining, terminations coordinator, materials coordinator, job planning document control, mechanical completions coordinator, quality control and turnover lead.

I believe the reason I have been given the privilege in working in so many roles is due to my cooperative nature and my strong desire to work as a team member in accomplishing the work that needs to be done. I am currently available for employment and will work in any available role.

I enjoy being part of a positive environment where everyone brings their talents to the table and works together to reach completion efficiently, correctly and safely.

I will do my part by bringing my skills and experience to the table realizing that though I have much to offer I also have much learn.

Work Experience
