OBJECTIVE

To get a growth oriented position in a reputed organization where my skills can be utilized for improvement and success of organization.

SUMMARY

Highly motivated person and also known for being well-organized and always having a positive attitude, very dedicated, focused, and highly reliable. I also have a very flexible schedule to meet your company's needs.

EXPERIENCE

- Worked at **ELECON ENGINEERING LTD. (Internship)**:- I have been trained there how to use micrometers and vernier callipers and learned the different purpose of gauges. Also I have prepared 2D drawings on AutoCAD Software and also created 3D models in AutoCAD and Creo Parametric Software. Also learned to set machine to zero position with respect to part.
- Worked at **Pruthvi Engineering Ltd. (four months)**:- there my designation was as a Designer where I have to create drawings in AutoCAD software and also created and analyzed 3d models using Creo software. **In group with the help of other design engineers have designed bearing housing, Input Housing, Motor Adapters (major production of company) and also Torque Arm for ELECON company.**
- Currently I am going through many practical subjects where I have learned and done practical's in PLC, Familiar with Inventor MasterCAM software, used milling and lathe machine.

EDUCATION QUALIFICATION

- **Current Institution** : Loyalist College (Last Semester)
