Dear Hiring Manager,

I am a Level 1 Heavy Duty Technician Apprentice who graduated from Vancouver Community College with a 90% average and exemplary attendance.

During my three months working at Falcon Shuttle Rail Inc. I had the opportunity to work on a lot of specialty builds for railroad companies. Specifically, I worked on air brake systems, hydraulics and fabricating truck bodies. I also did work experience with CP Rail for three months. During that time I was privileged to work on their specialty equipment and their trains.

I am incredibly coachable and eager to learn. I am personable and I know that I will be a great fit because I am a hard worker, and I am motivated by my desire to learn. I feel fulfilled when I complete a task to the best of my ability and am able to develop my skills along the way.

I have my own tooling, a clean Class 5 license, and my own reliable transportation. I have no commitments outside of work and therefore will be a flexible and dependable employee.

Thank you for having a look at my resume,

Gemine Taddei
