Skills

Expenditure Management

As a purchaser for a maintenance cell, there was a responsibility to manage expenses through a quote system and maintain records of purchases and reasons for them.

Information Management

Course provides an overview of information management and its fundamental practices and principles in the Department of National Defense.

Contracting Direct with Trades

As a purchaser for a maintenance cell, working with outside agencies and trades is a requirement. Explanations of problems and requirements are a frequent experience.

Hazardous Occurrence Investigation

As a safety representative I am responsible for writing accident reports and investigating the cause while in the workplace. The results of the investigation would lead to changing procedures for a safer workplace when required.

Green Procurement

From 2013 to present; held the position of a purchaser for maintenance cell. This includes the requirement to remain current on government policies pertaining to purchasing of environmentally safe products.

WHMIS

Controlled Goods Awareness

Learned about the handling and access restrictions that apply to both equipment and information about the equipment and how these restrictions affect you in your job.

Fall Arrest

Course taken for working at heights and the safety requirements and knowledge of fall arrest equipment.

Project Management Fundamentals

Course taken to expand my ability to run projects and create a clear and concise image for people to work from.

Operator Safety Aware Forklift

Two day course on the operation and safety protocols of running a forklift. Received military certification.

Building Excellence in teams

Course on team building, communication in a team and providing insight and guidance on interdepartmental issues.

Firefighting military course

Operation of extinguisher classes for A, B, C, and D class fires. As well as the use of fire hoses and emergency pull systems.

First Aid and CRP level C

Course through the Red Cross
