

As a Royal Canadian Journeyperson Naval Shipwright; naval equivalent of a Millwright, I installed, maintained and repaired engineering systems and mechanical equipment. Those technical skills and abilities, along with my Power Engineering knowledge and my extensive Military training, have aided well in providing a well-rounded employee who has excellent work ethics, strong discipline, and pays great attention to details. Proof of my dedication and direction is clear by the fact that I was accelerated through 11 Military rank levels in 13 years.

MILITARY TRADE EXPERIENCE

APPRENTICE SHIPWRIGHT

Jan 1993 - Dec 1995

National Defense, Victoria

- Trained as an apprentice shipwright and completed the 2-year journeyman course
- Maintained / trouble-shot / repaired fuel, air-control, HVAC, fire-fighting, fresh water, and pollution abatement systems on-board various Naval vessels
- Completed full-cycle installation of mechanical equipment on-board various Naval vessels
- Concurrent duties at sea included working as a fire fighter and flood control expert

JOURNEYMAN SHIPWRIGHT

Dec 1995 - Aug 2005

National Defense, Victoria

- Managed the efficient installation, maintenance, and repair of various mechanical systems including pneumatics, fuel, HVAC, fire-fighting, fresh water, and pollution abatement systems on-board various Naval vessels
- Designed, fabricated, and installed auxiliary mechanical equipment that regularly employed the use of metal, wood, and plastic products, and those projects often employed the use of my brazing, welding, and all other shop machinery skills
- Performed testing and recording of fuel systems and water systems
- Managed the allocation of work for the 20-member workshop and ensured all activities were completed following best practices
- Trained over 180 people in the theoretical and practical techniques of fire fighting
- Concurrent duties at sea included working as a member of the Counter - Terrorism operations team

MILITARY EXECUTIVE EXPERIENCE

NAVAL OFFICER
