Heavy Duty Mechanic # 316248

Objective

To obtain a position that will utilize my skills and experience allowing for further advancement and job placement within our company. I am qualified and competent individual accustomed to working in high Stress situations.

I am a qualified Heavy Duty Mechanic with a fully equipped service truck

Qualifications

I have extensive experience in all types of equipment and machinery. This experience includes all types of diesel gasoline and alternate fuel source powered equipment. I am confident in all types of repair including hydraulic, electrical, water, air systems ,compression, and power generation.

I have contracted to various logging and road building operations on the West Coast providing mechanical and welding services. I have a wide range of experience on all equipment from stump to dump as well as road building equipment. I also have a vast experience on all types of light and other heavy equipment including automotive,marine and stationary units.

I am excellent at troubleshooting and have confidence in all areas of repair, rebuilding and welding.

I have approximately 5 years experience in Gas Compression> my experience includes troubleshooting repair and overhauling.
