Objective:

To find long term, full time employment as a technician in an environment which promotes personal growth with opportunities for further career advancement.

About myself:

I am a dual ticketed mechanic with red seal endorsement for Automotive service technician, Heavy-duty technician/off road and Heavy-duty technician/truck and transport mechanic. I am self-motivated and have a consistent quality of work. I also view myself as a leader with a drive to learn from mistakes and improve on myself. I am proficient with computers and diagnostic software.

Work Experience:

Cervus Equipment – March 2017 – Present

Position: Shop Technician. Gained experience with both electric and engine powered material handling equipment. Worked with Clark, JLG, Daewoo, JCB as well as other lesser known brands. Performed engine diagnosis/repairs on diesel, gasoline and propane systems, transmission diagnosis/repairs, electrical work, hydraulic diagnostics/repairs as well as welding and fabrication work.

Simson Maxwell – November 2013 – March 2017

Position: Field technician/PM technician/shop technician. Obtained OEM training on Deutz and Volvo Penta engines. Received in house training for automatic transfer switches, and program training for deep sea controllers and ComApp controllers, plus GIW trash pumps.

Performed engine diagnosis/repairs and rebuilds on natural gas, gasoline and diesel systems up to 1 MW. AC and DC electrical diagnosis and repairs, welding and fabrication work.

Hertz equipment rentals – March 2013 – November 2013

- Position: Shop and field technician. Responsible for maintenance and repairs of rental fleet, inspections and repairs of light towers, generators, forklifts.

RTL/Westcan - March 2012 – March 2013

- Position: Shop and field technician. Repaired highway tractors/trailers - flat decks, fuel tankers, refrigeration trailers, and equipment repairs - generators, small engine equipment, off-road equipment, etc. Performed engine diagnosis/repairs. Trailer suspension/brakes/air-system/hydraulic-system repairs.

Simson Maxwell – August 2010 – February 2012

- Position: Shop and field technician. Experienced working with power generation, AC electrical systems; DC controls/start panels, fabrication, power generation and diesel engine diagnostics. Obtained experience working on Genie equipment, JLG, Volvo Penta, Deutz, Perkins, Kubota and other various industrial manufacturers. Rebuilt industrial engines. Required to work independently in the field where I obtained valuable experience with problem solving, and developed strong diagnostic skills.

Freedom Ford – July 2009 – August 2010

Position: Ford Fleet Specialist with specifics towards Ford 4x4 systems, electrical diagnostics and engine performance/diagnostics. Completed automotive apprenticeship to obtain Journeyman AST certification with Red Seal endorsement.

Team Ford – April 2006 – July 2009

Position: Apprentice Automotive Service Technician. New to the trade worked as a general technician.
