About me:

I am French and English. I've been around construction for a while. I'm a quick learner and always want to learn more. I am from Ontario and grew up on farm land.

I am active, passionate, I have dreams, I am a perfectionist, good with clients, respectful, independant and happy. I have awesome google reviews under Rick Menard heating and cooling and Reliance Home Comfort in Calgary. I do not like any work drama. My hobbies after work is motocross, ski, rock climbing, hiking and fishing. I do race motocross

Achievements:

Motocross - Won 2nd place overall amature in FMSQ  
Motocross - Won 1st place overall in Junior FMSQ  
Motocross- Won 3rd overall in Intermediate FMSQ  
Motocross - Won a few races 250B in USA GNCC

Experience:

Siding, doors and windows - Every summer from 2011 to 2015

Owner: André Lavigne - 613 295 8896

- Install doors and windows (Cut opening bigger if needed, Shim the doors to have it leveled, Change header if needed, Foam or insulate around the doors, Cap around the doors with sheet metal, Install hardware)
- Install Siding, Cement boards and Cap cod (Install Typar, Strapping around the house, mount the material with a level, Install solfit, Silicone around windows, doors and grills.
- Install Stages and Scaffolds
- Use ladders
- Keep the area clean and presentable to a client

La Cité Collégiale - 2015 to 2016

- Obtained my Gas and Oil licence (G2 and OBT2)
- Certificate of Completion System 636
- Ozone Depletion Prevention Card
- Working at Heights
- WHIMIS
- Wardflex training
- Gastite training

Rick Menard Heating & Cooling - 2015 to 2018

Owner: Luc Menard - 613 834 1415

Junior to Senior Installer:

- Install AC (Size Refrigerant lines, Run linset nice and straight, Build ac coil pan with one inch fold all around to have it rigid, Slope the pan towards the drain, Build the pocket door and seal around the corners with silicone, Size wire from panel to Disconnect box, Install the breakers and size the breakers with the manufacture instructions, Install drain with CPVC and add an open TEE, Connect thermostat wires to condenser and furnace, Install and level brackets or pads, Charge unit according the manufacturer recommendations, Connect electrical from disconnect box to condenser, Protect the wire with liquid tite or conduit, strap conduit every feet, Pressure test and Vacuum line set, Calculate Subcooling and Superheat, Calculate TD)
- Install Ductless Systems and Heat pumps
- Replace furnace (Install 636 Venting with proper cutting wheel and reamer, Apply primer and glue, Strap venting every three feet, Respect the code book for terminations, Seal with silicone around the pipes, Always try to two pipe for more efficiency, Drop liners with needed, Build a transition from supply plenum to furnace, seal the transition, Connect return with new filter rack, Calculate return elbow for proper offset and opening, Order sheet metal, Drain the furnace with CPVC and add an open TEE, Level furnace, Change thermostat wire if needed, Connect gas and check for leaks, Connect 120v to furnace with dedicated circuit, Adjust gas pressures, Calculate TD, Install carbon monoxide detectors)
- New Home Construction
- Radiant Floors (Pipe layout on wood and styrofoam, Respect the length of every loops, Install manifolds, Add thermostat to every loop, Pressure test the piping layout before applying concrete on top)
- Install Boilers Systems - Learning
- Install Hot water tanks (Drain old tank, Install 636 venting if needed, Run 120v plug to tank if needed, Connect gas and check for leaks, Install pressure relief tube, Adjust temperatures, Drop liners if needed, Connect to chimney with B vent, Change water shut off valves if needed)
- Install Tankless System
- Duct Installation - New Home duct installation, renovations installations, commercial restaurant ductwork
- Install thermostats
- Install humidifiers
- Install Gas lines (Black pipe, Gastite, pressure test, Sleeve gas thru foundation or wall, add gas shut off valves at every equipment, Add swing joints if needed, Paint gas line with anti rust paint,

- Pool heaters (Perform water connections, Connect gas line and check for leaks, Level pool heater, Build the slab with concrete, Add chimney if needed, Paint gas line)
- HRV (mount the HRV, Connect the duct work either dedicated or semi dedicated with the bath fans, Connect wiring)
- Solder Copper for Plumbing (Clean, sand and apply paste of copper before welding, Do not heat copper too much when using solder - Solder melts at 370°F)

Reliance Home Comfort Calgary - 2018-2019

Phone: 403 264 4822

Senior Installer:

- Install Furnace (Connect ductwork, Seal ductwork, Connect gas piping and check for leaks, Connect 636 venting using the proper tools with glue and primer, Connect drain and add open TEE, Connect wiring and perform wire pull if needed, Install wireless thermostat in worst case scenario, Level furnace, Install EAC filters)
- Install Softener (Install as manufacturer recommends, Level the softener, Add 120v plug, Programme softener following manufacturers instructions)
- Install Humidifiers (Cut opening on Return plenum, mount the humidifier nice and straight on return side, Seal around the humidifier with silicone, Connect duct from Humidifier to supply plenum, Never install take off on supply plenum directly on AC coil - Humid air corroded AC coils, Install drain with trap if needed, Connect water lines - Never use outside water tap lines)
- Install Ductless Systems (Mount head nice and straight in a central area, Insulate both lines if it has a built in heat pump, Connect voltage, Slope drain towards the outside, Add pump on drain if needed, Install condenser nice and leveled, Run the lineset nice and straight, Seal outside, Connect wiring to condenser, Pressure and Vacuum line set, Add refrigerant if needed with the proper calculations specified by the installation manuals of the unit)
- Install AC (Run line set nice and straight, Bend copper, Pressure and Vacuum line set, Install and level brackets or pad, Install and size breakers, Install and size AC wire, mount disconnect box, Protect AC high voltage wire with conduit on the exterior of the house, properly support conduit every feet, run thermostat wire from condenser to furnace, Install CPVC drain with open TEE)
- Close jobs with the programme Reliance uses
- Pull my own jobs according to the paperwork of the job
- Fix ups from previous installers

Harmony heating and cooling - 2019

Phone: (403) 207-5338

- Re/Re on furnaces, Hot water tanks, Tankless, Ac, Humidifier, Mini split with slim duct
- Re-design mechanical rooms for better airflow or convert two forced air systems into one system.
- Hrv's
- Kitchen hood range
- Ductwork modifications and new installs
- Gas lines
- Balance Ac's and furnaces
- Install communicating equipment
