**Subject:** Entry Level Plumbing/Pipe Fitter Apprenticeship Program

To Whom It May Concern,

I am a high school graduate, graduating with a Specialist High Skills Major in Construction. Through the High Skills program I gained experience in electrical, plumbing, carpentry, machining, welding and general construction. Having the opportunity to explore many of the trades, I learned my main areas of interest for a career path are in the plumbing and electrical trade. Presently I am seeking employment with a company that is offering an apprenticeship program in the plumbing/pipe fitting industry.

During the 2018/2019 school year I successfully completed the 1<sup>st</sup> year in the Electrical Technician Program at Conestoga College. Through my exposure to the theoretical aspects of the electrical industry I have realized that my desired career path is to earn my certification as a plumber/pipe fitter. Although continuing at Conestoga College may be beneficial in being exposed to general training and theoretical aspects however, my belief is that much more can be learned through the enrollment in an apprenticeship program where there will be more hands on experience with professionals in a variety of applications.

I believe that you will find me to be a friendly, dedicated, flexible and high energy individual with good communication skills who enjoys working with and interacting with people on either a one on one or team basis. I look forward to exploring any and all opportunities that you may have for such a program.

Pease do not hesitate to contact me if you have any questions and I look forward to meeting with you to discuss any potential apprenticeship opportunities.

Sincerely

Desmond Flynn

### **Profile**

Outgoing, highly motivated and computer literate college student whose education has focused on technical programs targeted towards my goal to achieve certification as an electrician. I am now actively looking for enrollment in an entry level electrician apprenticeship program where I can work towards achieving this goal.

### **Education**

#### **CONESTOGA COLLEGE**

##### **Electrical Technician Program**

Education and training included but was not limited to the following:

- Residential install – wiring and electrical circuits
- Prints and standards – blueprint reading and electrical codes
- Wiring, basic control and PLC's
- DC motors – wiring and motor control
- Electronics – basic electrical circuitry
- DC and AC fundamental – calculating values of circuits
- Instrumentation – wiring measuring systems and control
- Wiring methods – learning to bend pipe and wiring commercial circuits

#### **ST. BENEDICT CATHOLIC SECONDARY SCHOOL**

##### **Exploring the Trades Course**

- A program designed to provide students with a general overview and hands on experience in a variety of Skilled Trades environments. Details of this program can be provided upon request.
- Graduated grade 12 with Ontario Scholars Award

#### **ST. MARGARET of SCOTLAND PRIMARY SCHOOL**

### **Work History**

#### **ACCUCAM, Cambridge, Ontario** (January 2018 to present)

A global manufacturing company specializing in precision castings, machined components and assemblies for the OEM market.

- As a part time student employee, held positions of general labourer and machine operator.

#### **WALMART, Cambridge, Ontario** (March 2016 to January 2018)

A multi-national retail corporation

- As a part time student employee, held a variety of positions in the material handling segment of the local business with duties including receiving, unloading of incoming carriers, stocking of shelves etc.

### **Personal Interests and Accomplishments**

I enjoy learning new skills in areas such as mechanics, carpentry and electronics as well as participating in a variety of outdoor activities including mountain biking and camping.

Achieved over 100 hours of volunteerism.
