EDUCATION

<u>2004-2006</u>	State Technical University, Moscow-Russia ❖ M.Sc. Information Systems
<u>2000-2004</u>	State Technical University, Moscow-Russia ❖ B.Sc. Information Systems

CORE SKILLS

ICT Solutions Design & Implementation

Combining attention to details, analysis of process flow and global experience in industry best practices, I design and implement turn key solutions for institutions globally. With a Make-It-Happen and No-Excuse attitude, solutions are designed and implemented within time, cost effectively and enthusiastically. The byproduct of expertise has ensured system resilience, customer efficiency and peace of mind.

Business Development

Employing technology biased enthusiasm and natural people and communication skills, I creatively enlighten customers on the value proposition of technology adoption. Using solution design skills, I study needs of a society and design value added solutions and services to ease the way of life of people. People skills enables me to build bridges between people from all spheres of life, from students to ministers of state, and technological services or solutions

Project Management

With a Thorough-Think-Through approach, I establish project core objectives with customers/partners, identify stakeholders, outline deliverables, determine resources and logistics, recruit, set out timelines, plan execution, monitor and report on project activities. I have successfully managed projects for multinational corporations and multiple national institutions in the telecoms, financial, governmental, educational, insurance and medical sectors.

Business Continuity Management

Employing Thorough-Think-Through and Process Flow skills, I plan and execute business continuity plans for institutions with unique focus on “Operations during a disaster”. Combining expertise from designing Business Continuity Plans (BCP) for multinational and national institutions, I continue to perfect the art of strategizing business continuity management.
