PURE Dining Table

The anchor point of DAVANI + PURITY, this is the world's first and only pure stone extendable dining table with a drop-in leaf that fits into a concealed storage compartment right inside the table.

/ Fix table in Travertino Paglierino
/ Recessed led light around the base

The sleek expanse of its stone surface appears to float lightly over a sculptural base, the whole inspired by the ripples of water and the natural imperfections that are created by nature when water meets stone. It is made to appear more weightless still by gentle underlighting at the floor.

The unparalleled integrity of the travertine makes this table both pure in form and enduring in function and beauty.

It is a table meant for gathering, for conversation. Whether for residential dining or corporate meetings, its striking beauty and organic elegance is meant to awaken the senses, to aid in becoming fully present both to others and one's self.

Table 1 - Low nesting table

Table 2 - Medium nesting table

Table 3 - High nesting table

Table 5 - Rectangular dining table/desk

Table 6 - Round dining table

Like an ingenious puzzle, each uniquely shaped slab has been carefully sculpted to key into its partners without fasteners to create a balanced whole.

The freedom of shape made possible through computer aided stone cutting, combined with traditional stone carving techniques, lend these artfully realized objects a timely and timeless character.

Like sand or earth rendered solid, the subtle shifting movement of the stones selected for these tables in their initial offering work as a foil to the flowing curvaceous lines.

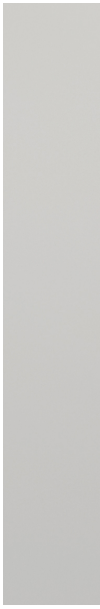
The Lamé Table Series, nature nurtured for the interior landscape.

Developed as functional sculpture, the organic silhouettes of these deceptively simple tables have been rendered with an abstract clarity that is meant to balance natural and nurtured form.

KEY FEATURES:

Flat pack

The flatpack feature allows for easy assembly of the tables. Each uniquely shaped slab has been carefully sculpted to key into its partners without fasteners to create a balanced whole.



Natural Material

The primary materials emphasize the raw beauty found in nature. The stones have a unique fossil-like quality, and a neutral color palette.
